Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's Application filed on March 26, 2004 has been reviewed.
2. Claims 1-21 are presented for examination.

Drawings

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Clark et al.

(Hereinafter "Clark") US Patent Application Publication No. 2004/0153663.

As to claim 1, Clark teaches the invention substantially as claimed, comprising:

receiving at least one input address [obtain street address information, 10 of fig. 1; 0040;

comparing said at least one input address to at least one standard [compare to old street address or a reference address, 12 of fig. 1; 22-80 of fig. 2; 0041]; and

providing a single best address corresponding to said at least one input address based on said comparison [update address file, 84 of fig. 2].

As to claim 2, Clark teaches the invention substantially as claimed. Clark further teaches matching said single best address to a database having unique business identifiers associated with addresses to find a matching address and providing said matching address [0032-0034; 0043].

As to claim 3, Clark teaches the invention substantially as claimed. Clark further teaches that said database is an advanced office system (AOS) [0041].

As to claim 4, Clark teaches the invention substantially as claimed. Clark further teaches providing a match project analysis report [0290; 0296; 0301].

As to claim 5, Clark teaches the invention substantially as claimed. Clark further teaches converting said at least one input address to a predetermined record layout, before comparing said input address to said at least one standard [30-80 of fig. 2].

As to claim 6, Clark teaches the invention substantially as claimed. Clark further teaches associating said at least one input address with at least one code, said code being used to determine said single best address [0051-0081; 0094-0103].

As to claim 7, Clark teaches the invention substantially as claimed. Clark further teaches associating said at least one input address with at least one score, said score being used to determine said single best address [0222-0223; fig. 19-15].

As to claim 8, Clark teaches the invention substantially as claimed. Clark further teaches that said at least one standard is at least one selected from the group consisting of: ZIP+4 coding, coding accuracy support system (CASS), Locatable Address Conversion System (LACS), delivery sequence file (DSF), and National Change of Address (NCOA) [0041-0042].

As to claim 13, Clark teaches the invention substantially as claimed. Clark further teaches a matcher for attempting to match any address in said output file or said invalid records to a matching address in a database having unique business identifiers associated with addresses [0023-0030].

As to claim 14, Clark teaches the invention substantially as claimed. Clark further teaches an investigator for investigating any address not matched, upon request [0031; 0036].

Art Unit: 2165

As to claim 15, Clark teaches the invention substantially as claimed. Clark further teaches that said pre-auditor calculates a plurality of counts associated with said input address file [0010; 0031].

As to claim 16, Clark teaches the invention substantially as claimed. Clark further teaches that said input address file includes a plurality of records and each record includes a plurality of fields [0088-0216].

As to claim 17, Clark teaches the invention substantially as claimed. Clark further teaches that said count is at least one selected from the group consisting of: a number of distinct values by field, a missing field count, a total number of records, and a percent of distinct values [missing field count, 0129-0136; 0150-0153].

As to claim 18, Clark teaches the invention substantially as claimed. Clark further teaches that said view is at least one selected from the group consisting of: alphabetical, most frequent content, and alpha characters only [0032-0034; 0036].

As to claims 9, 10-12 and 19-21, all limitations of these claims have been addressed in the analysis above, and these claims are rejected on that basis.

Art Unit: 2165
